Dear Neighbour

## Tilbury2

### Aggregate Deliveries

Further to our previous correspondence, we continue to make progress with the aggregate shipments and have so far successfully imported over 150,000 tonnes of aggregate. The next delivery is scheduled for Tuesday 1 October.

#### Aggregate Deliveries

The next aggregate delivery is now due to arrive on Tuesday 1 October (subject to weather conditions).

Due to sailing times and port berth restrictions, when the ship docks, we have to off load and transport the aggregate from Bontrup Pearl to the Tilbury2 site to allow the ship to then sail again within a 3 to 4-day timescale.

As the time constraints for offloading is dictated by sailing times, **this will require lorry and machinery movements outside of the notified site working hours and will involve continuous working to include weekend and night time movements and could take up to 72 hours or more to complete.**

In total a fleet of 25 tipper lorries will be shuttling aggregate at the following times and locations:  
Tilbury1 to our site entrance on St Andrews Road between 8am and 4pm Saturday and Sunday  
Tilbury1 to Tilbury2 from 4pm until 8am.

A Section 61 Application, (variation to working hours) remains in force with the local authority Environmental Health Team who look after noise and pollution matters and Consent has been given under Section 61(1) of the Control of Pollution Act 1974 for the site team to carry out continuous aggregate deliveries and for stockpile management associated with these deliveries.

A number of additional control measures have been introduced to mitigate as much intrusive noise as possible, this includes:

- Removing rumble strips along the road to reduce lorry vibration
- All lorries are FORS accredited and have the latest safety equipment and drivers briefed regarding speed limits and vulnerable road users, such as pedestrians, cyclists and horses
- Tower Lights are operated by silent generators
- A one way system is in operation, ensuring lorries do not need to reverse

Other plant that will be operating to assist the unloading and levelling of the aggregate at Tilbury2 will be 2 excavators and a bulldozer, which will also be operating outside the site working hours.

We will advise of the next sailings, once the dates have been agreed with the shipping company.

#### **Considerate Constructors Scheme**

GRAHAM is a trading style of the GRAHAM Group.

The GRAHAM Group comprises the following companies: John Graham Holdings Limited (Registered Number NI 57921); John Graham Construction Limited (Registered Number NI 3503); Graham Investment Projects Limited (Registered Number NI 71467); Graham Asset Management Limited (Registered Number: NI 71100).
